

HIMSS[®]

WHO WE ARE.

THE PEOPLE WHO INSPIRE US

HIMSS has served the global health community for more than 60 years, with dedicated audiences in **80+ countries** across Africa, Asia, Europe, North America, and South America.

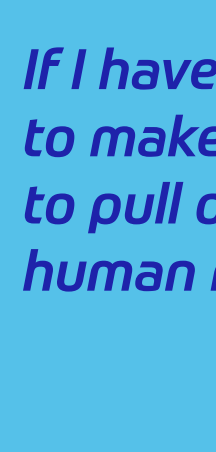

OUR MEMBERS

HIMSS members are the heart of our organization, and we aim to create a dedicated space for everyone across the vast healthcare spectrum. **Within the last few years, our global community has grown by over 34%**, a testament to the strength of our offerings and the powerful contributions of the people we serve. Our members represent a vibrant composition of expertise and an extensive network of information and technology changemakers passionate about transforming health locally and worldwide.

If I have the platform and opportunity to make a change, why shouldn't I use it to pull others up towards attaining their human right to health?

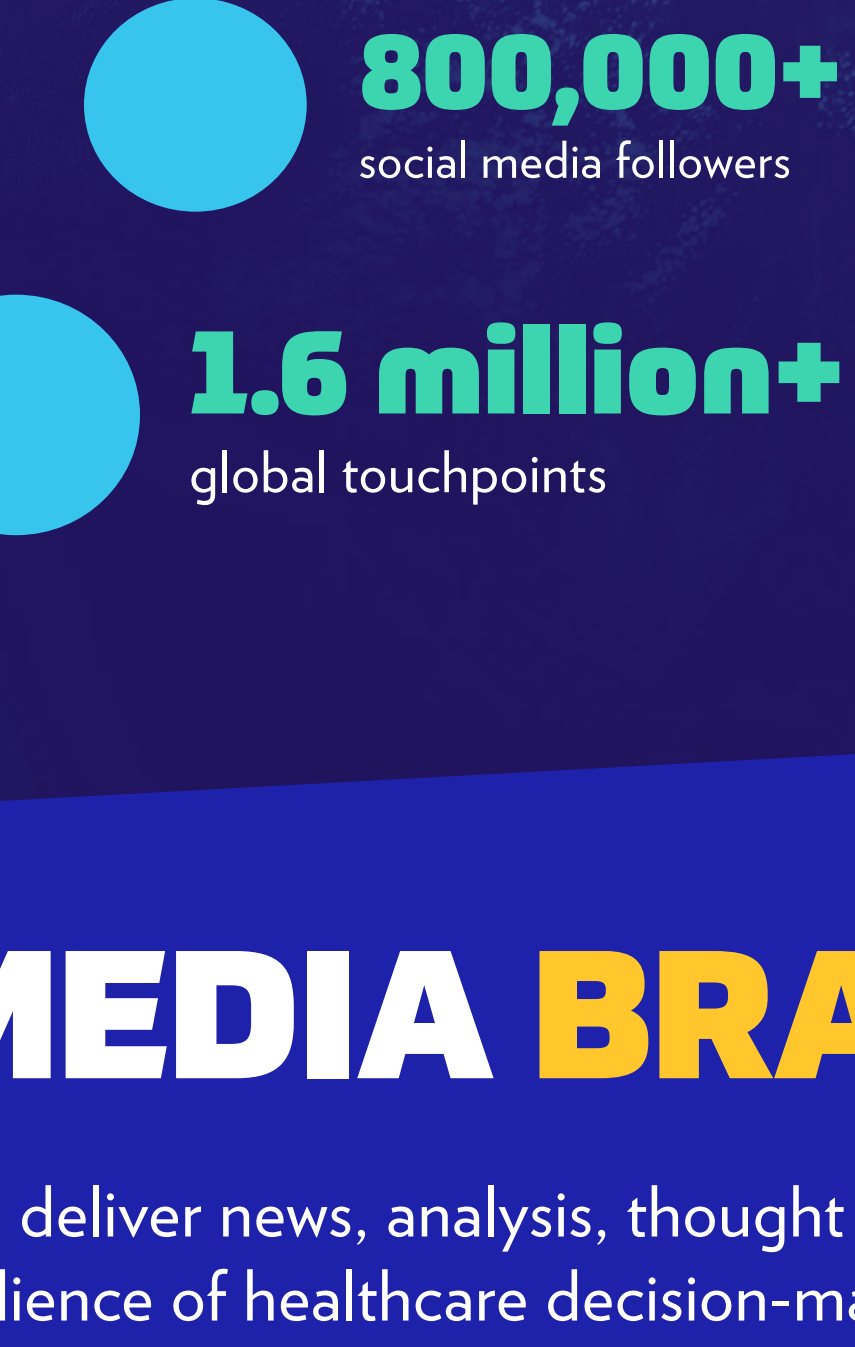

Debra Maufi, MBBS, MBA
HIMSS Member, Global Health Equity Network Task Force

Debra is a health information and care services professional who has used her experience to transform global health, ensuring no one gets left behind when it comes to accessing affordable, quality healthcare. Beyond HIMSS, she is also the CEO at LORESA, a healthcare advisor at Babymoon Care B.V., and a healthcare consultant who supports health organizations aiming to improve access to health information and care services in resource-limited settings.

OUR GLOBAL REACH

Whether in-person or online, HIMSS is a gathering point for professionals across the global healthcare ecosystem, helping them forge meaningful connections with like-minded experts through education, advocacy, public policy, events, and thought leadership opportunities.

Our flagship conferences are engaging people around the world:
Orlando • Rome • Korea • Middle East

MEDIA BRANDS

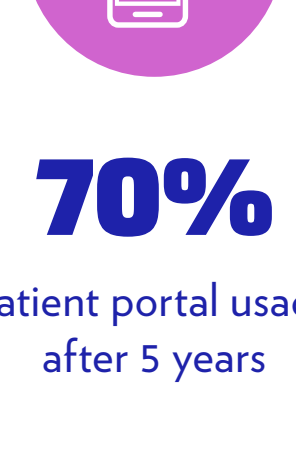

We deliver news, analysis, thought leadership and educational content to a global audience of healthcare decision-makers, keeping them informed, and equipped to shape the future of care.

DIGITAL HEALTH TRANSFORMATION

Working with global health leaders, we've created evidence-based frameworks to build, measure, and transform digital health for providers, their patients, and the organizations they serve.

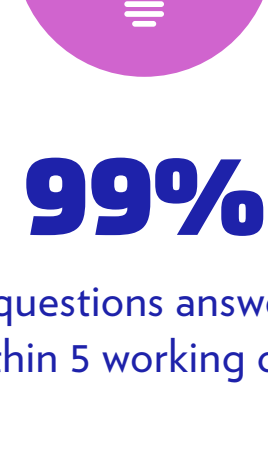

Working with Radboud University Medical Center in Nijmegen, The Netherlands, elevated their clinical operations, streamlined caseloads and reduced workflows by using EMRAM to guide their patient outreach. **Radboud took their patient portal usage from 5% to 70%**, a feat that helped them achieve HIMSS EMRAM Stage 7.

70%
patient portal usage after 5 years

8.5 / 10
patient satisfaction score

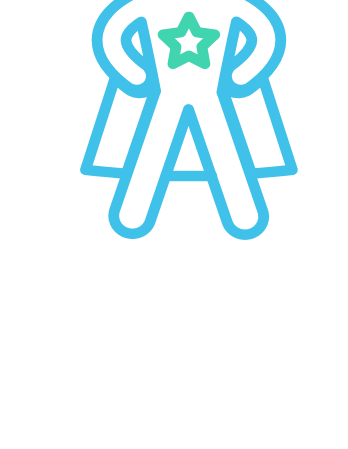

99%
of questions answered within 5 working days

HERE'S HOW HIMSS HELPS GLOBAL HEALTHCARE SYSTEMS PUT DIGITAL TRANSFORMATION INTO ACTION.

67,000+
global maturity model assessments

2,880+
Stage 6 or 7 validations

850 million+
patients leveraging HIMSS's digital health transformation
